**NEW PETUNIA NANA COMPACT MIXED**—Introducing a new strain of Dwarf Compact Petunias. While there has always been in existence one or two varieties of Petunias that could be classed as Dwarf Compact, this is the first time that a complete mixture with a well balanced range of color has ever been offered in a Dwarf Compact Mixture. Each plant in this mixture forms a perfect ball effect from eight to ten inches high and about twelve inches in diameter. Each plant in this mixture is a perfect symmetrical specimen and represents the result of many years of careful selection through a group of colors representing deep rose, rose-pink, pink, pale pink, crimson, white, and striped effects in all these colors. As a mixture it is well balanced in all the colors. We strongly recommend this improved strain for use wherever Petunias are needed—in pots, window boxes, borders, beds, and they are even suitable for rock gardens.
